As an election official I want to be able to share the results to social media So that the election results can be publicized
Acceptance Criteria After the winner(s) is selected, I want to be able to press a button to share it on a social media website.
Definition of Done I would want to make sure that the results are correct and that when the users press the button, they are properly transferred to a social media site of their choice with the results
Effort: Small, Medium, Large, Extra Large (estimate of effort and time) OR number of hours needed Medium

As a Election Official I want to have a graphical user interface (GUI) for setting the date of the election So that I can easily input and update the election date
Acceptance Criteria (conditions that have to be fulfilled to ensure the story is complete) I would like a GUI component that allows election officials to input and update the date of the election The GUI is easy to use and intuitive for election officials of different technical abilities
Definition of Done (what is required by the team before sending out for review) GUI for setting the election date is implemented and tested for accuracy and efficiency The user interface is updated to include the GUI component for setting the election date The system can handle different scenarios (e.g., multiple elections, delayed elections) Code is reviewed and tested by the development team
Effort: Small, Medium, Large, Extra Large (estimate of effort and time) OR number of hours needed

Large
